-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 8, 2008 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 9 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 9 and 10 recite the limitation "wherein the cover means comprises a first part and a second part" in lines 1 and 2, respectively. This is a double inclusion of "a first part and a second part" claimed in claim 1, line 10.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-6, 8-11 and 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,417,258 to Privas.

Privas shows a device for spraying fluid as seen in Figs. 22 and 28, having a replaceable or refillable container 100 with a detachable dispensing head 1; The dispensing head encloses valve means 6, a valve actuating solenoid 13 with a metal armature 12, a battery 102 (as a power source), electronic device 101 to control the opening and closing of the valve. The cover has a first part 144 with a hook and a second part 104 with indentation where reader 146 mounts, both parts lock and cooperate with respect to each other; the first part has the hook 107 that can engage the indentation portion defined by element 106 to lock the cover to the container.

Response to Arguments

6. Applicant's arguments filed October 8, 2008 have been fully considered but they are not persuasive. Applicant argues that Privas is silent about any portion of the device outside the solenoid being metal and does not disclose or suggest a solenoid substantially enclosed in a metal cover. Privas shows an armature 12 made of a magnetic field inducing material (a metal) substantially enclosing the solenoid and the valve. In order for the material enclosing the solenoid to have any effect on the magnetic field generated by the wire coil 13 in the device of Privas this material has to be metal; In addition, the material use to make the external part of the cover has no effect on the properties of the magnetic field generated by the coil.

Conclusion
